

ADEGBOLA AYENI

Profile

Economics graduate with a strong interest in economic research, data analysis, and business operations. Skilled in conducting empirical studies using econometric tools such as EViews, with emphasis on education and macroeconomic performance. Seeking to contribute analytical and administrative skills within a professional organization while building a career in research and data analytics.

Skills

TECHNICAL SKILLS

- Microsoft Excel
- EViews
- Data Visualization (Power BI)
- Data Cleaning and Reporting
- Statistical Analysis

SOFT SKILLS

- Analytical Thinking
- Communication Skills
- Attention to Details
- Team Collaboration
- Problem Solving

Education and Certification

BACHELOR OF SCIENCE (EDUCATION) IN ECONOMICS

Ekiti State University – Ado-Ekiti, Ekiti | 2025

Major Coursework: Econometrics, Statistics, Macroeconomics, and Microeconomics
(Second Class Lower)

DIPLOMA IN DATA ANALYSIS

AltSchool Africa | 2026

Major Coursework: Python, Excel, SQL

Featured Projects

Gender Inequality in Education & Economic Development – Personal Project

- Analyzed 43 years of time-series data (1981–2024) on Nigeria's economy using ARDL econometric modeling. Conducted unit root testing (ADF) and cointegration analysis (Bounds Test). Modeled GDP per capita as a function of gender parity, literacy, labour participation, and unemployment. Identified short-run negative impact of gender parity ($\beta = -43.22$) as a transitional investment effect. Discovered structural inefficiencies in translating female education into labour market outcomes. Performed diagnostic tests ensuring model reliability (no heteroskedasticity or serial correlation). Generated policy-relevant insights on education, labour markets, and economic growth.

Single Parenting & Academic Performance – Client's Project

- Investigated the effect of single-parent family structures on the academic performance of 200 secondary school students in Oyo Town, using a descriptive survey design and stratified random sampling. The study combined descriptive statistics with an independent-samples t-test and Cohen's d effect size analysis to compare outcomes across family types.

Assistive Technology & Inclusive Education – Client's Project

- Conducted a survey-based study on the impact of assistive technology on students with physical challenges in secondary schools in Oyo State. Analyzed data from 150 respondents (teachers and students) using descriptive statistics and Chi-square testing. Identified a 70%+ gap in assistive technology availability across schools. Evaluated relationships between technology access, academic performance, and classroom participation.

Work Experiences

ECONOMIC RESEARCH AND DATA ANALYST – *Freelance* – Ibadan, Oyo | 2023 - Present

- Conducted independent, data-driven research projects across major economic themes affecting Nigeria.
- Built interactive dashboards, econometric models, and reports for clients, enabling data-backed decision-making in education, transportation, and sustainability sectors.
- Used EViews and Excel to perform regression analysis, descriptive statistics, and policy forecasting with up to 95% model accuracy.
- Delivered clear, insight-rich presentations to both technical and non-technical audiences.
